FULL PROGRAMME

SOUND FAMILIAR?

You've tried the apps. **Nothing stuck.**

Most parents we speak to share the same frustration — their child watched coding videos, earned badges, then forgot everything. Orbit is built differently: live mentors, real accountability, projects you can actually show grandparents.

Endless screen time, zero output

Passive video courses with no mentor checking in. Kids finish a module and can't explain what they built.

Shy, hesitant to speak up

Great at homework but freezes in presentations. No safe space to practise pitching or leading.

Empty extracurricular section

College and scholarship applications need proof — not another certificate PDF from an app.

AI anxiety, no guidance

ChatGPT is everywhere but no one is teaching your child to use AI responsibly and creatively.

WHAT CHANGES WITH ORBIT

Visible progress every week

Websites, pitch decks and business projects appear in your parent dashboard — not hidden in an app.

Confidence that compounds

Kids present to mentors, peers and live audiences. Parents report personality shifts within weeks.

Scholarship-ready portfolio

500+ opportunities mapped by age. 10+ verified projects for competitions and college apps.

AI literacy with guardrails

100+ tools with mentor oversight. Safety, ethics and responsible use taught from day one.

REAL FAMILIES · REAL OUTCOMES

Children change. So do their parents.

Six months in, parents tell us the shift shows up at the dinner table — bolder ideas, clearer communication, projects they're proud to share.

★★★★★

"She used to be too shy to order food. Last weekend she pitched her pet-sitting business to four neighbours. She is not the same child."

Sarah C.
PARENT · MUMBAI

→ First business · ₹40k/month

★★★★★

"He sees opportunities everywhere — even in the school cafeteria queue. The mindset shift is permanent."

Michael R.
PARENT · LONDON

→ Led school fundraiser · ₹2L raised

★★★★★

"Best investment we ever made. He is now mentoring younger kids and speaking at school events without notes."

Jennifer P.
PARENT · SAN FRANCISCO

→ Student council president

BUILD REAL PROJECTS

PITCH WITH CONFIDENCE

LIVE MENTOR SESSIONS

180 DAYS · TANGIBLE OUTCOMES

Not badges. Proof.

By the end of the Young CEO journey, your child leaves with a portfolio admissions teams and scholarship panels actually remember — built with mentor guidance, not copied from a tutorial.

Live website or app

Built with AI Studio tools and mentor code review — shareable link for school and family.

Pitch deck + recording

Investor-style presentation practised in pitch labs with founder mentor feedback.

Business plan & financial model

Pricing, revenue and cost thinking through Startup Empire simulations.

Scholarship shortlist

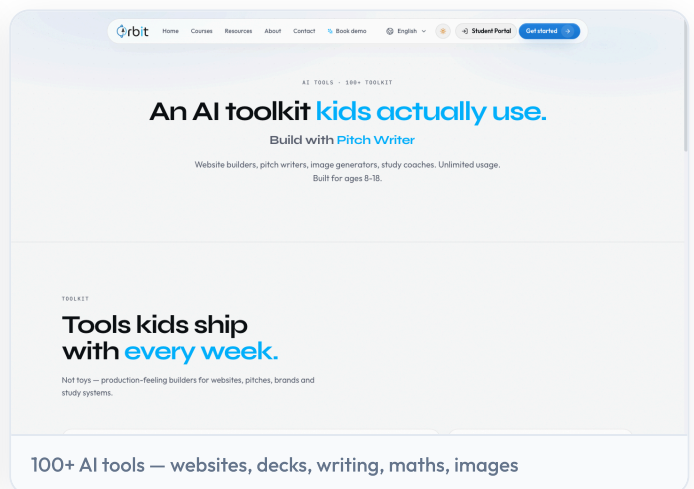

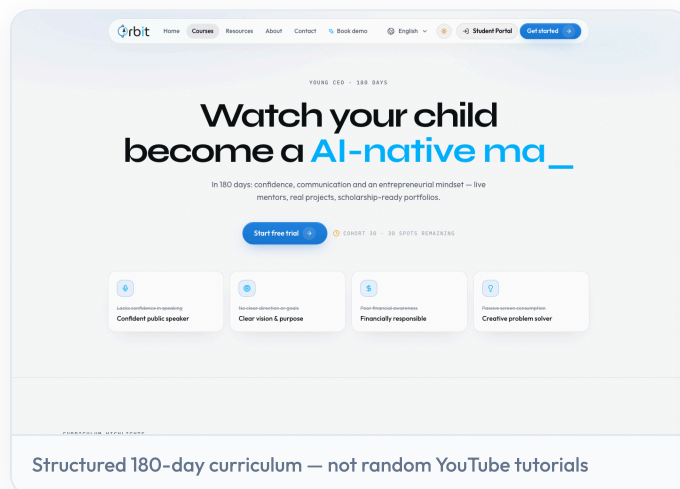

Age-fit opportunities from 500+ mapped programmes — with deadline tracking.

Competition entries

Science fair, entrepreneurship and innovation contests aligned to their project.

Verifiable certificates

Module completions and demo-day awards for counsellors and applications.

01

Play

Business games and simulations that teach pricing, strategy and decision-making.

02

Build

Real websites, apps and pitch decks — not toy exercises that get deleted.

03

Launch

Live showcases, mentor reviews and pitch nights with real audiences.

04

Win

Portfolio shipped, scholarships targeted, confidence that lasts beyond the programme.

THE #1 REASON PARENTS STAY

Real mentors. Not recordings.

Two live 60-minute sessions per week with founders, designers and operators who've built real companies. Cohorts capped at 18 — your child gets airtime, feedback and accountability every single week.

Mon / Wed	Live cohort class — build, present, get mentor feedback (60 min each)
Sunday	Founder office hours — 1:1 project reviews and Q&A
Anytime	AI Studio, games & portfolio work — with progress visible to you

PROGRAM · BUILD TRACK

Coding & robotics for teens who want to ship

Parents comparing hands-on coding classes for teens often find passive video catalogues. Orbit embeds coding inside venture projects — websites, games, APIs and optional hardware integrations — with live debugging and mentor code reviews.

[Join the next AI cohort](#)
[All programmes](#)

What students build

Projects connect to business outcomes: storefront sites, simple games, automation scripts and demo-day prototypes — not isolated syntax drills.

- Guided builds with mentor code review
- APIs, no-code bridges and intro Python/JS paths
- Optional robotics / maker integrations where cohorts allow
- Git-style versioning habits for older teens

FAQ

Do you teach robotics hardware?

While we do not teach robotics hardware, we do offer optional integrations with robotics kits. This course track

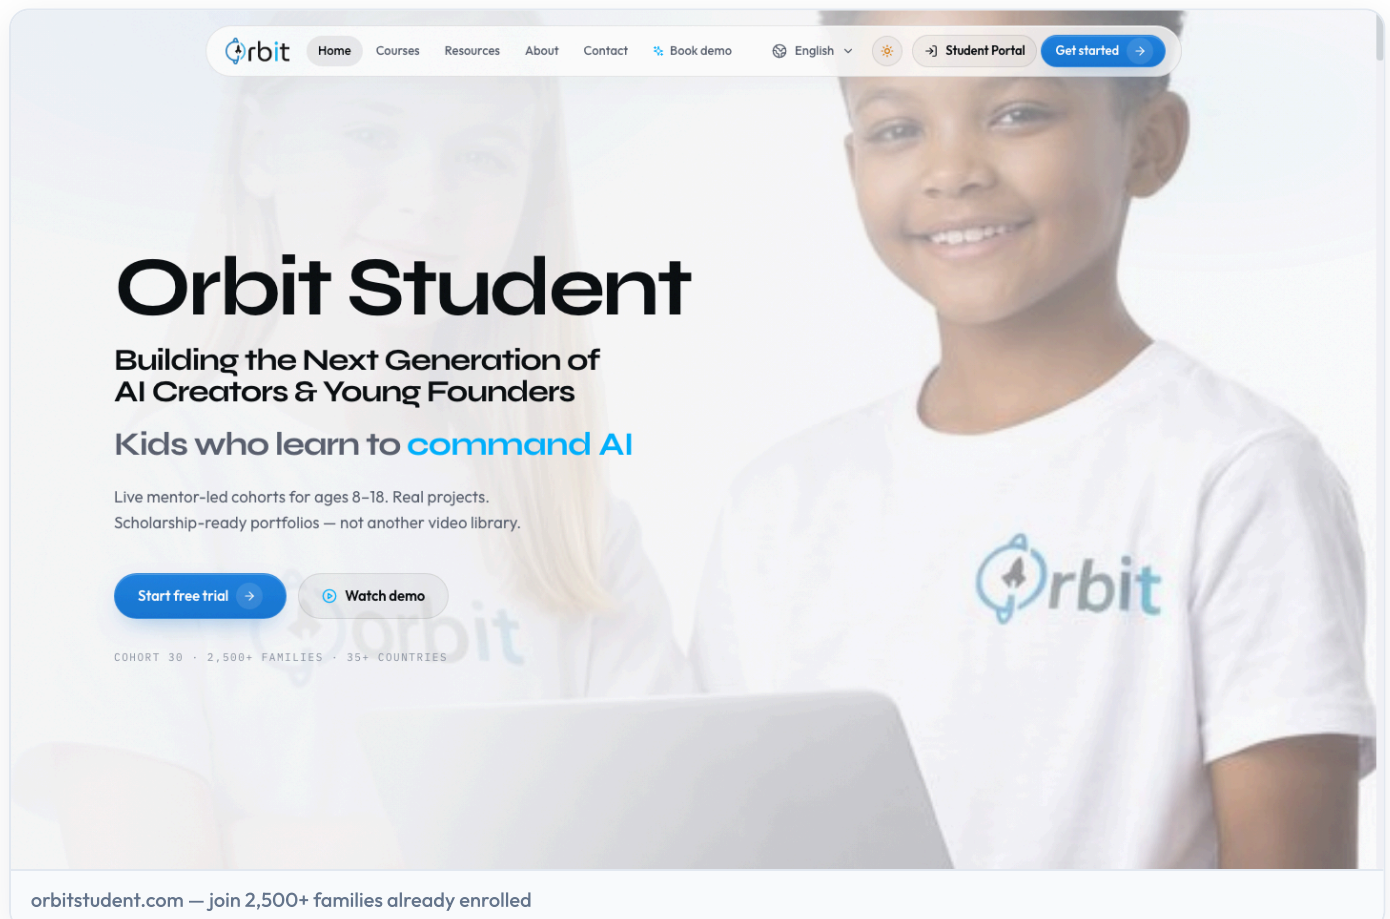

Coding & robotics — real builds with mentor code reviews

SIDE BY SIDE

Most platforms ship videos. **We ship transformation.**

If you've compared coding apps, tutoring centres or online courses — here's why 2,500+ families chose Orbit instead.

OTHER EDTECH	ORBIT STUDENT
Pre-recorded videos	Live mentor-led classes + simulations
Generic content for all ages	Personalised path for ages 8–18
Get a certificate PDF	Build a real portfolio of sites, games & pitches
No scholarship guidance	500+ scholarships and competitions database
Learning stops at logout	Streaks, levels and quests kids ask to come back to
No parent visibility	Dashboard progress reports and milestone alerts
\$50–100/hr tutoring with no portfolio	\$299 full programme — 52 live sessions included

THE CLOCK IS TICKING

Every year you wait, your child falls behind.

Students who start at 8 build six years of portfolio depth before high school. Orbit age-bands adapt content so beginners and advanced teens both ship real projects.

EARLY BIRD · BEST VALUE

Starts at 8

- ✓ 6 years of portfolio building
- ✓ 10+ competition wins by 14
- ✓ Scholarship-ready by 16
- ✓ AI-literate since elementary

AVERAGE START

Starts at 14

- 2 years of rushed prep
- 1–2 activities to show
- Generic application essays
- Playing catch-up with peers

TOO LATE

Starts at 17

- Too late for most programmes
- Empty extracurricular section
- Missed scholarship windows
- Panic-mode applications

COMMON PARENT QUESTIONS

Is this suitable for beginners?

Yes. Mentors scaffold every tool and project by age band. No prior coding required for ages 8–11.

How is AI safety handled?

Responsible use, privacy basics and age-appropriate guardrails taught explicitly in every session.

Can this help with college applications?

Teens leave with verifiable projects, competition entries and mentor guidance on what to highlight.

What if my child doesn't like it?

30-day money-back guarantee. Enrol risk-free — if it's not the right fit, you're covered.

How are classes scheduled?

Two 60-min live sessions weekly + Sunday office hours. Times shown in your timezone after signup.

Can parents see progress?

Yes. Milestones, module completion, portfolio pieces and class replays are visible in the dashboard.
